

Sample Employee Survey for Workplace Charging Planning

Batter electric vehicles (BEVs) and plug-in hybrid electric vehicles (BHEV) use electricity as either their primary fuel or to improve fuel efficiency. Dozens of BEV and PHEV models are available with more added each year, expanding driver options. We are considering the installation of charging infrastructure to assist employees who drive BEVs and PHEV's to work. Your responses to this survey will be used to determine employee interest in this benefit.

Participation in this survey is voluntary and you do not need to respond to any of the questions that you do not wish to answer.
